PACIFIC SEED COMPANY

Successors to W. R. Strong & Co.
C. B. Strong & Co. D. Dierssen & Co.

Sacramento, - - - California

TO OUR FRIENDS

In handing you our catalogue for 1904, we beg to apologize for its small proportions, but we have a pleasant surprise in store for you next year when we will issue and mail free to all customers for 1904, one of the best catalogues ever sent out by any firm in California. It will contain over 100 pages, with more than 1000 illustrations and 2 beautiful colored plates. We are already at work on it and are having all the descriptions and cultivations written by practical and experienced men. Do not miss this valuable work. Remember it will only be sent to buyers of seed during this year.

SPECIAL NOTICE

Although our catalogue is small we wish to state that we have just imported large and complete stocks of choice vegetable and flower seeds, having procured them direct from the best California, Eastern and Continental sources. All the old seed that we had left over were destroyed: over \$700 worth of seeds were thrown out. We hope our efforts to supply you with reliable seed will be appreciated. We are now in a position and do hereby **guarantee everything we send out to grow**. This will prove to you the care we use in testing and proving our seeds.

PLEASE USE THE ORDER SHEET

In making up your order kindly use the order sheet and extend prices as given in catalogue. Don't forget to deduct the discounts as mentioned on page 5. Always enclose the money, which can be sent by postal order, express order, check or stamps. No goods sent C. O. D. unless portion of the amount is sent along with the order.

OUR NEW PREMISES

Are situated at the corner of 7th and J streets and are fitted up with the very latest machinery for cleaning, grading and testing our seeds, and also the very latest improvements in styles of fixtures, seed drawers, etc., thereby enabling us to fill orders correctly and with utmost dispatch. We fill orders the same day as received. Again thanking you for past favors, we remain,

Yours to command,

PACIFIC SEED CO.

1904 NOVELTIES IN FLOWER SEEDS

ASTERS

NEW GIANT WHITE BRANCHING COMET—We consider the new type the best introduction in the Aster Family for many years past. They are very strong growers, with Flower Stems 12 to 15 inches across. The petals being beautifully reflexed as in a fine Japanese Chrysanthemum. The plants carry from 30 to 40 large and perfect flowers. Price, 15 cents per packet; 2 packets for 25 cents.

NEW GIANT BRANCHING COMET CARMINE—Same as above in Habit, but a beautiful rich Carmine Color. 15c per packet; 2 packets for 25c.

NEW GIANT BRANCHING COMET, CARMINE STRIPED WHITE—This is the latest addition to this new class and is the prettiest of all. 15c per packet; 2 packets for 25c.

NEW GIANT BRANCHING COMET, SILVER TIPPED BLUE—A most unique combination of color, very large flowers, and beautifully curled. 15c per packet; 2 packets for 25c.

NEW GIANT BRANCHING COMET, ROSE PINK—A lovely shade. Looks exquisite in table decorations or bunching. 15c per packet; 2 packets for 25c.

SPECIAL OFFER In order to induce our friends to try these beautiful New Asters we will send 1 packet of each to any address for 30c.

COSMOS

MAMMOTH FANCY—It is impossible to describe adequately these exquisite new varieties. They embrace many shades of crimson and mauve, also pure white and white delicately tinted and clouded. There are monstrosous white flowers, with flecked and pinked edges and pink flowers of the same type. The dark crimson flowers resemble large single dahlias. The flowers measure from three to four inches across. Per packet, 10c.

DAWN—This new variety comes into bloom in May and continues to flower until cut down by severe frost. Of good size; the handsome circular flowers are white, with a delicate tint of rose at the base of the petals. The plants are of compact, bushy growth, about four and one-half feet high. Valuable particularly for the North, where the seasons are too short for other strains. Per packet, 10c.

NEW EARLY BLOOMING—This beautiful new strain produces abundantly well-formed, lovely flowers of large size, pure white, pink, and crimson in color. It can be had in bloom from May to November and grows freely everywhere. Per packet, 10c.

NEW IMPROVED YELLOW—A vast improvement on the old yellow variety, the flowers being about twice as large. The plants begin to bloom when very young and continue with wonderful profusion throughout the entire season. Price, 10c per packet.

CHRYSANTHEMUM MAXIMUM

PERFECTION—A fine pyramidal variety, entirely hardy and producing very large, daisy-like flowers the second year from seed. The plants are of strong but close, compact growth, eighteen inches high and twelve inches in diameter, with glossy, deep green leaves. The large, single flowers, measuring two to two and a half inches across, are borne singly on long, stiff stems, very desirable for cutting. The large, broad petals are pure, snowy white and arranged in star-like rays about the deep yellow center. Strong plants will bloom sparingly the first year from seed and quite freely throughout the season in the following year. Per packet, 10c.

NOVELTIES—Continued

NEW ROYAL SWEET SULTANS

(Centura Imperiallis)

The result of a cross between "C. Moschata" and "C. Margaritae" and inherit from the latter the beautiful sweet-scented, artistic-shaped flowers, but much improved in size and borne on long, strong stems, and when cut will stand for 10 days in good condition. The plant itself is much stronger than any other Sweet Sultan, of the easiest possible culture, flowering continuously from early Summer till Autumn. The plant is vigorous, growing nearly 4 feet high, easy to grow, and literally covered with enormous flowers nearly double the size of C. Margaritae, with the same odor and same form; the stems are long enough to satisfy the most exacting. Price, 10c per packet.

NEW GIANT ESCHSCHOLTZIAS

THE GOLDEN WEST—Grand New Eschscholtzias, developed from "E. Maritima," a pretty variety, having light canary yellow flowers with an orange blotch at the base of each petal, forming a Maltese cross in the center. The original flower measured two inches across. The flowers of these new giants measured from $3\frac{1}{2}$ to 5 inches in diameter; they have very large overlapping petals, often delicately waved at the edges. They are beautifully and variously formed; some are flat and wide open, some saucer-shaped, others very deep with flaring edges. In some the orange blotch almost suffuses the whole flower, in others it runs into the yellow in fine penciled lines, others again have an orange center with a margin of clear yellow, while the Maltese cross in some of the flowers is very distinct. Gorgeous beyond description. 20c per packet.

GIANT CURLED PANSY

MASTERPIECE—A remarkable new type, which will, without doubt, be warmly welcome by the numerous lovers of this beautiful class of plants. The chief difference from other strains consist in the form of the flowers, the border of each petal being conspicuously curled or waved, giving the flower a doubled or globular appearance. The large size of the flowers and the extraordinary free-flowering qualities of the plant make them valuable for bedding purposes. Another feature of this marvelous strain is that it produces some tints of color not found in any other Pansy. 25c per packet.

MIGNONETTE

ALLEN'S DEFIANCE—Magnificent even in the open ground. Its full, round spikes, when grown under favorable conditions in the greenhouse, are of gigantic size, measuring from twelve to fifteen inches long, with individual flowers of enormous size and of an intensely rich perfume. The graceful spikes, borne continuously, retain their beauty and fragrance in water for two weeks after cutting. Packet, 10c; 3 packets, 25c.

SWEET PEAS

3 New Dwarf Cupids.

BEAUTY CUPID—Grows only 6 to 7 inches and produces flowers equally as large as the tall flowering varieties. They are borne in wonderful profusion all over the plant. In color it is a delicate rose with lighter shading towards the edges. 15c per packet; 2 packets, 25c.

ALICE ECKFORD CUPID—Similar to the tall flowering Alice Eckford in flower, which is noted for its harmonious blendings and colors. The wings are a delicate silvery white with rose tints toward the base. Price, 15c per packet; 2 packets, 25c.

PRIMROSE CUPID—The flowers are a rich creamy-yellow tint. Very free flower. Height, 6 inches. 15c per packet; 2 packets, 25c.

Special Offer

Don't miss this opportunity.

We will mail one packet of each of the above new cupid sweet peas for 25c.

1904 NOVELTIES IN VEGETABLE SEEDS CUCUMBER

THE EMERALD—One of the finest and most attractive varieties for table use. Vines strong and vigorous and continue in bearing a long time if fruits are kept gathered as fast as they are ready for use. The cucumbers are quite large, very smooth, regular in size and shape and of a rich dark-green coloring. When ready for use they measure 10 inches long by $2\frac{1}{4}$ to 3 inches in diameter, are perfectly round and smooth, with thickness carried well out to the ends, which are quite blunt. Flesh white and very thick in proportion to the diameter. 10c per packet; 20c per ounce.

MUSKMELON

GENUINE ROCKY FORD—This delicious melon is of the "Netted Gem" type, oval in shape and beautifully netted. It has been improved at Rocky Ford, Colorado, a section noted for its fine muskmelons, and from this point they have been shipped in carload lots to every city in the United States, thus gaining a national reputation for the "Rocky Ford." The melons average about 5 inches in length and are of most delicious flavor; flesh is smooth grained and light-green color. This is the most popular variety of muskmelon grown and in season will be found on the tables of all the leading hotels and restaurants. The seed we offer is of the true oval type so highly prized by the growers at Rocky Ford, Colorado. Packet, 5c; ounce, 15c; $\frac{1}{4}$ pound, 30c; pound, \$1.50; postpaid.

PAUL ROSE or PETOSKEY—A decided improvement in the salmon-flesh varieties. A cross of the "Osage" with "Netted Gem," and combines the sweetness of former with the fine gray netting of the "Gem," making a very handsome melon. The melons grow uniform in shape and size, average diameter being about 5 inches; flesh thick, firm and beautiful; deep salmon or orange color; deliciously sweet and melting. Its size and general appearance make it a splendid basket melon which will soon become a favorite with the market gardener, also for the private garden. Our seed was grown from originator's stock and is pure. Packet, 10c; ounce, 25c; $\frac{1}{4}$ pound, 60c; pound, \$1.50, postpaid.

GOLDEN EAGLE—This grand new variety is the result of careful cross-breeding and selection. It is a strong, vigorous grower and remarkably productive, succeeding well in nearly all locations. The fruits are of good size, remarkably fine quality and firm enough to stand shipping. The oval fruits are quite uniform in size, being about 10 inches long and 7 inches in diameter in the center portion, well ribbed, heavily netted and of a light golden hue when ripe. The flesh is very thick, ripening well down to the rind and the seed cavity is small. The flavor and aroma of the ripened fruit are delicious; the rich salmon-colored flesh is sweet and melting. Per packet, 10c; $\frac{1}{2}$ ounce, 20c; ounce, 35c; $\frac{1}{4}$ pound, \$2.

ONION

THE AUSTRALIAN BROWN—Is of medium size, wonderfully hard and solid, and most attractive for market, both as to form and appearance. They are **extremely early** in ripening, and never make any stiff-neck or scallions. Every seed seems to produce a good-sized onion, and the bulb begins to form very quickly—when the plant is not over three inches high. Planted with the Red Westerfield, it proved to be nearly four weeks earlier and ripened off more uniformly. From its firmness and hardness, it **will keep in good condition longer than any other Onion known**. The color of the skin is a clear amber-brown. So widely contrasted from any other Onion is this color that it will be noticed on market, and when once bought, purchasers will most likely call again for "those beautiful brown onions." Per packet, 10c; ounce, 20c; 2 ounces, 30c; $\frac{1}{4}$ pound, 50c; per pound, \$1.75, postpaid.

NOVELTIES—Continued

WATERMELON

WONDERFUL (or McIver Sugar)—In our trials of Watermelons during the past Summer the "Wonderful" proved to be the sweetest and most desirable of all. It not only grew to large size, but ripened up uniformly and made fine, solid melons. It originated with a melon grower in North Carolina, and is only of recent introduction outside of its native clime, but grows satisfactorily in all districts where watermelons will ripen. It is a very sweet solid-fleshed sort, often grows to the length of 2 feet, and from 12 to 16 inches in diameter. The rind is marked with broad bands of yellowish-green, shading to deep green; shaped oblong; is entirely stringless, and free from hard core. We consider it an acquisition to the list of Melons. Packet, 10c; ounce, 15c; $\frac{1}{4}$ pound, 30c; pound, \$1.00.

TOMATO

HONOR BRIGHT—A splendid new variety of unusual value. One of its most striking characteristics is the singular color-changes the fruit undergoes during its development. It is at first of a light green color, then turns to a striking waxy white, next lemon, and finally to a rich bright red. Its long-keeping quality makes it especially valuable for shipping long distances. It is almost proof against cracking of skin after heavy rains. The fruit is of good size, very solid, the vines vigorous and very productive, and the tomatoes of excellent quality. Per packet, 10c; ounce, 30c; $\frac{1}{4}$ pound, 75c.

NEW FORAGE PLANTS

PASPALUM DILLATATUM

The Best Pasture and Hay Grass Ever Produced

FROM AUSTRALIA

We are pleased to be the first seedsmen to offer this wonderful new pasture grass, as we are positive it will prove to be the best grass ever introduced into California, as the Australian climate is similar in every respect to ours. Hereunder we give you description of same as received from the growers of experimental stations in the colonies. This new grass is unaffected by extreme heat or cold, and yielding enormous quantities of highly nutritious fodder, much relished by all kinds of stock, and is preferred to any other grass, as at all times it is green, cool and fresh, never becoming coarse or dry. Mr. McKeon, Government Experimental Farm, Woolongbar, writes: "Plants, in drills 18 in. by 6 in. apart quickly reached 5 feet in height and a test cutting showed a yield of 13 tons 7 cwt. to the acre. Again, from a seed plot sown on the 28th of September in cultivated land, a second cutting had been made by the 3d of June weighing at the rate of 19 tons 4 cwt. per acre; subsequent cuttings the same season yielded over 14 tons per acre—truly wonderful record, hitherto unheard of in any other forage plant." Its growth being so rapid that in cultivated land at least three crops may be obtained and as many as five can be obtained under favorable circumstances during the warm months. It can be cut almost every six weeks. It also stands grazing off at all seasons of the year and is excellent for milch cows, increasing the flow of milk.

Cultivation—Sow the seeds in drills 3 feet apart in the Spring as lightly as possible as soon as the ground is warm and make successive sowings throughout the Spring and Summer until February. After this date it is necessary to sow in boxes and cover with glass at any time and transplant when about 2 inches high. It must be remembered that Paspalum requires heat to germinate the seed. See that the soil is properly prepared. $1\frac{1}{2}$ to 2 pounds of seed is sufficient to sow an acre. Price, 10c packet; 25c per ounce; \$2.00 per pound.

THE WONDERFUL NEW VELVET BEAN

In the South this new forage plant is being entirely planted as it has proved itself to produce the best and heaviest crop of highly nutritious fodder ever introduced and also as a soil enricher it has absolutely no equal. We have no hesitation in recommending same to our customers in and around Sacramento County and further south but do not advise large sowings before experimenting in the northern districts. It is of a running or climbing habit and can be either planted and staked like pole beans or allowed to run along the ground. It also makes a very beautiful climber for a trellis, producing an enormous quantity of beautiful wisteria-like flowers. Price, 10c per packet; 25c per pound; post free. Prices per 100 pounds on application.

Two Grand New Field Corns

IOWA GOLD MINE—A new variety of wonderful merit. It is undoubtedly the finest 90 day large cob corn in existence. The ears are very large, perfect in shape, deep golden yellow grains and an enormous yielder, generally producing from two to three ears to the stalk. We recommend it with every confidence for almost any section of California. Price, 10c per pound; \$6.50 per 100 pounds.

IOWA SILVER MINE—A fit companion to the above variety. It is a little later in maturing but considering the size of cob and enormous yield it places it by long odds the finest white corn in cultivation today. It is a very strong grower but not very tall. Never has less than two ears to the stalk. Matures in 100 days. One of the greatest points in its favor is its extreme hardiness. Unsurpassed for meal. Price, 10c per pound; \$6.00 per 100 pounds.

SELECT LIST OF Vegetable Seeds

Best Seeds that Grow and a List
of Varieties it Pays to Grow

THE MOST LIBERAL PREMIUMS EVER OFFERED BY ANY SEEDSMAN

50 CENTS worth of Seeds extra will be allowed on each ONE DOLLAR sent us for Seeds in PACKETS. Thus, any one sending us \$1.00 can select seeds in packets amounting to \$1.50; for \$2.00, seeds in packets amounting to \$3.00; for \$3.00 seeds in packets amounting to \$4.50; for \$4.00 seeds in packets amounting to \$6.00 and so on.

25 CENTS worth of seeds extra will also be allowed on each ONE DOLLAR sent us for Seeds in OUNCES. Thus, any one sending us \$1.00 can select seeds in ounces to the value of \$1.25; for \$2.00 to the value of \$2.50; for \$3.00 to the value of \$3.75 for \$4.00, seeds in ounces to the value of \$5.00 and so on.

LARGE-SIZED PACKETS—Customers frequently write us that our packets contain twice as much seed as those obtained from other houses; yet, notwithstanding our VERY LIBERAL PREMIUMS on seeds in packets and ounces, we shall still continue to put up with our standard gauges, the same LIBERAL-SIZED PACKETS of seed for which our house has always been noted. We have always found the liberal treatment of our customers to be one of the best paying features of our business.
